P R I Y A N K A M O H A N H U N D A L E K A R

Pune, Maharashtra, 411015, India|priyanka.hundalekar6264@gmail.com|9881196264

OBJECTIVE

AI/ML professional with 6 years of experience in software engineering, Data Science and enterprise AI solutions. Experienced in designing and developing Generative AI, Agentic AI and RAG solutions using Python, LLMs, LangChain, LangGraph, AWS and GCP. Hands-on experience with multi-agent orchestration, prompt engineering, guardrails, observability and intelligent workflow automation. Experienced in collaborating with cross-functional teams and clients to design and deliver scalable AI solutions.

PROFESSIONAL EXPERIENCE

ACCENTURE |**Title:** Ind&Func AI Decision Science Consultant ***(Jan 2026 to Present)***
Client: AMAZON
Duties:

- Architecting an Agentic AI solution for Amazon project using AWS services, LangChain, and custom LLM orchestration to automate decision workflows across business functions.
- Designed multi-agent systems with role-specific prompts, memory retention and adaptive reasoning to support contextual decision-making and task orchestration.
- Integrating APIs, observability layers, and guardrails to enable secure, scalable and traceable agent collaboration across enterprise environments.

Client: LUCA ***(Sept 2025 to Dec 2025)***
Duties:

- Developed Generative AI powered persona generation solutions using Azure OpenAI and BigQuery to transform large scale survey data into realistic synthetic customer personas for marketing and business decision making.
- Built automated data validation, profiling and refinement pipelines to improve the accuracy, consistency and quality of AI generated personas.
- Collaborated with engineering teams to develop scalable AI solutions supporting persona driven research and conversational experience.

COGNIZANT TECHNOLOGY SOLUTIONS |**Title:** Associate ***(June 2024 to Aug 2025)***
Client: NVIDIA
Duties:

- Led the design and development of GenAI solutions including multi-agent systems and RAG-based chatbots using LangChain, NVIDIA NIMs and GCP enabling intelligent document retrieval.
- Delivered applications with agents capable of decision-making, session tracking and multimodal interaction via Omniverse audiotoface with prompt engineering to enforce guardrails and ensure response consistency.
- Collaborated with cross-functional teams to architect scalable solutions, conduct live demonstrations for clients, and optimize performance through iterative testing, feedback loops, and observability mechanisms.

Title: Digital AI Agents – Macy's Contact Center Automation ***(Mar 2023 to May 2024)***
Client: Macy's
Details:

- Developed multi-agent AI systems using LangChain, Gemini 2.0, and GCP to automate contact center workflows, enabling intelligent task orchestration and real-time data retrieval.
- Built RAG-based chatbots leveraging NVIDIA NIMs and FAISS for document ingestion and context-aware response generation, integrated with Streamlit UI and Omniverse audiotoface.
- Engineered adaptive agents with decision-making capabilities, session tracking, and prompt guardrails to simulate human-like reasoning and ensure consistent, secure interactions.

Title: Agentic AI Use Cases – NVIDIA GTC ***(June 2022 to Feb 2023)***
Client: NVIDIA
Details:

- Built multi-agent workflows using LangChain, RIVA, and NVIDIA NIMs for software setup and troubleshooting.
- Used prompt engineering and memory retention for seamless agent collaboration and deployed a Streamlit UI for real-time, error-free execution.
- Developed agentic system incorporating agents to streamline and automate the process for various tasks.

Title: RFP Analysis and Summarization for Financial Document ***(Jan 2020 to May 2022)***
Client: WiSE
Details:

- Built a document summarization pipeline using OCR, NLP and zero-shot classification to extract key insights from financial RFPs.
- Structured extracted data into SQL databases and visualized trends using Power BI dashboards tailored for client analysis. Designed modular architecture and optimized workflows to improve processing speed and reduce manual effort.

TECHNICAL SKILLS

- **Languages**: Python
- **Frameworks & Libraries:** langgraph, langchain
- **AI & ML:** Machine Learning, Natural Language Processing, Large Language Models, Generative AI, Data Science
- **Specialized Techniques:** Prompt Engineering, RAG Evaluation
- **Cloud Services:** AWS, GCP, Azure
- **Business Intelligence Tools:** Power BI, Tableau

MASTERS PROJECTS

FINAL YEAR PROJECT
Title: Cyberbullying Detection and Classification in Indian Native Language ***(Oct 2023)***
Details:

- Curated and labeled a novel dataset of Hindi and Hinglish social media comments for cyberbullying detection, incorporating hate and non-hate sentiment tags.
- Fine-tuned transformer-based models (MBERT, MuRIL) to handle code-mixed text and accurately classify offensive content across multilingual inputs with an accuracy of 83.37% using MuRIL and 80.54% using MBERT.
- Published the trained model, annotated dataset and source code on Hugging Face as Hindi-Offensive-Analyzer-MuRIL, enabling public access and reproducibility.

CERTIFICATIONS

- Fundamentals of Agentic AI from Hugging Face ***(Nov 2025)***
- AWS Certified AI Practitioner ***(Sept 2025)***
- Agentic AI Day - Certificate of Appreciation for being finalist in Google Cloud Agentic AI Day ***(Sept 2025)***
- Vibe Coding Guinness World Record for contributing towards Generative AI Hackathon ***(Aug 2025)***
- IBM Watsonx Orchestrate Sales Foundation Certification received for professional excellence. ***(Jul 2025)***
- NVIDIA Certified Professional in Accelerated Data Science ***(Jan 2025)***
- Winning NVIDIA NIM Hackathon and representing Cognizant at CUDA Insight Innovators ***(Oct 2024)***
- Oracle Generative AI Certified Professional Certificate of Recognition ***(Jul 2024)***
- Microsoft Power BI Certified ***(Mar 2024)***
- Certificate of Merit for winning Hackathon at zonal level prize at in IIT Bombay ***(Sept 2018)***

EDUCATION

1. **Master of Technology in Data Science:** Birla Institute of Technology and Science, Pilani **Aggregate:** 9.30 CGPA
2. **Bachelor of Computer Engineering:** MES Wadia College of Engineering; Pune University **Aggregate:** 7.95 CGPA
3. **Higher Secondary Certificate:** Nowrosjee Wadia College; Maharashtra State Board **Aggregate:** 74.31%
4. **Secondary School Certificate:** St. Anne's High School; Maharashtra State Board **Aggregate:** 82.80%

CO-CURRICULAR AND EXTRA CURRICULAR ACTIVITIES

- Received appreciation from AIA Delivery's Global Head for winning the Reltio Hackathon. ***(Mar 2025)***
- Recognized by the Cognizant CEO for outstanding performance during M.Tech at BITS Pilani. ***(Nov 2024)***
- Digital Badge from the Leadership Development Academy for completing People Leadership Program. ***(Oct 2024)***
- Winner, NVIDIA AI Summit Hackathon, Mumbai. ***(Oct 2024)***
- Delivered live sessions on GenAI projects at Cognizant Pune office for clients over 3 consecutive days. ***(Jul 2024)***
- Represented Cognizant's GenAI use cases at HSBC's client location in Pune. ***(Jun 2024)***
- Won the Change Maker award for contributions to Skill Angel Outreach. ***(May 2023)***
- Received Steller performance award in Coding Club event. ***(May 2020)***
